

Richmond University Medical Center

Comprehensive Rehabilitation Center

PEDIATRIC THERAPY

We take a collaborative approach to your child's care. Our therapists have Neonatal Intensive Care Unit (NICU) and Pediatric Intensive Care Unit (PICU) training and can provide direct referral to Early Intervention/CPSE and additional assistance programs. Services include:

Speech therapy:

For communication challenges, oral motor concerns, articulation, auditory processing, and social skills.

Physical therapy:

For movement, motor development, and body function treatments to promote active participation in home, school, and community environments.

Occupational therapy:

For strengthening the development of fine motor skills, sensory motor skills, and visual motor skills needed to function and socialize.

For over 50 years, Richmond University Medical Center has provided advanced rehabilitation services and programs. Individualized treatment plans are tailored around each patient's specific recovery needs with the goal of restoring function and improving overall quality of life. Our team of experienced and dedicated therapists utilizes state-of-the-art equipment with the latest medically-proven therapies to maximize recovery as quickly as possible.

Our services include:

- ▶ Occupational therapy
- ▶ Physical therapy
- ▶ Speech, language, cognitive, and swallowing therapy
- ▶ Rehab Physician/Physiatry
- ▶ Pediatric rehabilitation
