

Richmond University Medical Center

Cancer Rehabilitation Services

At Richmond University Medical Center, our comprehensive cancer rehabilitation services are provided by an interdisciplinary team of specialists with one goal in mind: to improve the everyday quality of life for cancer patients and survivors like you.

Effective Care for Everyone at Every Stage

Whether you are recently diagnosed or a long-time cancer survivor, our outpatient services will effectively help you regain loss of motor skills and function brought on by cancer, surgery, or treatments. Our experienced team of therapists and physiatrists will partner with your oncologist to develop a customized and effective rehabilitation program to address your individual needs.

Our Team of Specialists Can Improve a Wide Range of Conditions, Including:

- ▶ Communication or swallowing issues
- ▶ Difficulty walking
- ▶ Fatigue and weakness
- ▶ Joint stiffness
- ▶ Lack of endurance
- ▶ Loss of flexibility due to scar tissue
- ▶ Pain management
- ▶ Poor balance, posture, and gait
- ▶ Reduced range of motion

We Also Provide Specialized Services, Including:

- ▶ Cognitive impairment therapy
- ▶ Equipment assessment
- ▶ Family training
- ▶ Home exercise planning
- ▶ Therapies specifically developed for cancer of the brain, head, neck, and breast
