

# Richmond University Medical Center

Post COVID-19 Care Center  
(PCC Center)

## HOW TO ACCESS THE CENTER'S SERVICES

- Speak to your primary care or family medicine physician or pediatrician to attain a referral to our center.
- Request a copy of your records from the hospital where you were admitted or your primary care physician so we may review it at your visit.
- Call to schedule an appointment: 718-818-1500

The PCC Center will provide you with the most comprehensive care for and continuous monitoring of your post COVID-19 conditions. We want to be with you every step of the way during your immediate and long-term recovery. Your continued health is our priority!

## ADULT PROGRAM

The PCC Center is available for those patients who have been treated for COVID-19. In addition to coping with myriad changes to their medication regimens, patients recovering from these conditions often experience long-lasting side effects including:

- ▶ Pulmonary disease
- ▶ Cardiac-related issues
- ▶ Anxiety and depression
- ▶ Chronic fatigue and loss of stamina

**The PCC Center features a multi-disciplinary team of experts including:**

- ▶ Primary Care/Family Medicine Physicians
- ▶ Pulmonary Medicine
- ▶ Cardiac Care
- ▶ Physiatry
- ▶ Psychiatry and Behavioral Health
- ▶ Infectious Disease
- ▶ Additional Specialists

## WHAT YOU CAN EXPECT

### Evaluation

You will receive a comprehensive medical evaluation related to your condition by a primary care or family medicine physician, nurse practitioner, or assistant. This will include a review of your previous medical records including blood work, radiology, behavioral health screenings, pulmonary testing, and advanced cardiac testing.

## Diagnostic Work-Up

Depending on the findings, additional testing may be required, including a CAT scan, swallowing evaluation, or physical therapy exam. Once all results are compiled, a detailed report will be mailed to your referring physician. It is our goal to keep your primary care provider informed of your progress.

## Your Personal Treatment Plan

In consultation with your referring physician, you will be given an individualized treatment plan. It may include pulmonary rehabilitation, physical therapy, scheduled office visits, follow-up studies, or home health services through Visiting Nurse Association of Staten Island (VNA).

## Mental Health Support

**New York State COVID-19 Emotional Support Helpline: 844-863-9314**
